

Marissa CUSD #40

Marissa, Illinois

The **\$1.3 million** energy-savings project was funded through a grant, ESSER funds, and Trane's exclusive contract with Illinois State Board of Education (ISBE) Education Purchasing Program (EPP)

New upgrades: HVAC equipment and automation controls. The district will implement the infrastructure upgrades in their junior and senior high school buildings to help improve student learning environments.

Benefits: The new upgrades will create a more comfortable environment, reduces rising energy and operational costs, replace outdated systems and address maintenance.

Reduction of energy usage of roughly 72,000 kWh in electricity annually is anticipated. This is equivalent of more than 10 homes' electricity use each year.
