

Create your fleet strategy to identify near-term and long-term charging needs

Evaluate how much electrical demand your building can support

Contact your utility provider for guidance on type and cost of infrastructure needed

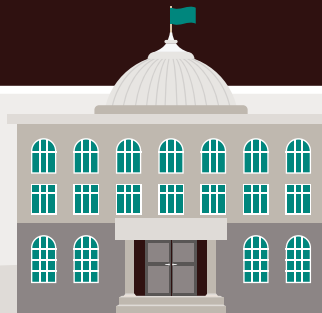

## Are you ready for an electric fleet?

Here are some guidelines to consider as you prepare to power up.

Calculate total cost of ownership, including vehicle procurement and maintenance, charging installation and local energy rates

Explore incentives and funding from government organizations

Collaborate with third-party organizations that offer power management solutions
